wellness & spa

Thinking about the comfort zone of women, TEXPOL offers textiles of the highest quality, which will help you take care of your clients.

Out of concern for the common good, all our products have the **OEKO-TEX Standard 100 class 1** certificate, which means they are safe for the skin and the environment.

All products are manufactured in our factory near Łódź, which employs people with disabilities.

Our offer includes: bamboo hair towels, cosmetic pads, towels: classic, muslin, for massage and cosmetic beds, cosmetic headbands, and facecloths.

The stars of our offer are delicate muslin towels dedicated for facial treatments, made of bamboo and alga fabric.

bamboo hair towels

A bamboo hair towel is ideal for drying your hair quickly without damaging its delicate structure. Hair does not like to be rubbed with traditional towels. Thanks to natural properties of bamboo, the hair towel absorbs moisture three times more quickly, and so it dries your head skin and hair in a safe and natural way.

Composition: 100% bamboo viscose
Size: standard
Weight: 500g/m²

care **facecloths**
for face and body

A facecloth is an attractive alternative to a sponge. It is perfect for washing the whole body, and also for facial treatments offered by beauty salons.

SeaCELL® alga fibre is a concentrate of minerals floating in the ocean waters, and their estimated lifespan in the fabric is a few dozen washing cycles. Algae in bamboo fabrics can work miracles in direct contact with the skin. They soothe irritation, they have antibacterial properties, and they enrich the skin with minerals. Applied to inflamed areas (diabetic foot), they quicken skin regeneration, which was confirmed by multiple tests on patients suffering from this condition.
